

World Food Safety Day is celebrated on June 7 every year. It is recognized by the WHO and aims to raise awareness about food safety issues globally.

Food additives are substances added to food to preserve flavor or enhance its taste, appearance, or other qualities.

The WHO hosted a live social media Q&A on food safety, joined by experts and influencers to engage the public.

Veterinary drug residues in food are chemicals that remain in meat or animal products after treatment. These are monitored for toxicological evaluation.

Agencies like WHO, FAO, and Codex Alimentarius Commission are actively involved in global food safety efforts.
